

RDL-3000 XP Enterprise

3300-3800 MHz Wireless Remote Subscriber for Premium Wireless Access

The Enterprise wireless Customer Premise Equipment (CPE) provides high performance TCP/IP transport for dedicated access, trunking and midrange backhaul applications. Either deployed in pairs for point-to-point (PTP) service or connected from multiple sites to the Aviat Networks' Ellipse series base station in point-to-multipoint (PMP) applications, Enterprise terminals economically deliver reliable, simultaneous voice, data and video services.

Superior performance allows for lower antenna heights and significantly reduced deployment costs. Flexible mounting options and full over-the-air provisioning lowers upfront costs and yields faster ROI.

Enterprise CPE offers the most cost-effective solution while Enterprise XR and Enterprise RF meet the challenge of sites requiring extra power or extended distance.

ENTERPRISE FEATURES

- Installs in minutes on buildings and street furniture
- Push all provisioning (SLAs), upgrades and Pay-as-You-Grow features over-the-air
- Comprehensive warranty, maintenance and optimization packages for lowest TCO
- Supported by industry's first CRM-integrated auto-provisioning system
